

## Memorial Day Logic Puzzle

Kari, Nate, Susan, and Josh are exploring the cemetery as the adults decorate the graves for Memorial Day. They challenge each other to find the oldest date on a gravestone. Use the clues to match the kids with the dates they found: 1887, 1896, 1902, and 1911. Who won the challenge? \_\_\_\_\_

1. Susan's date was not in the most recent century.
2. Josh's date was 9 years older than Kari's.
3. Nate's date was an even number.

	1887	1896	1902	1911
Kari				
Nate				
Susan				
Josh				

Use the grid, if you'd like, to eliminate possibilities. Put an "x" in a box if you know a date doesn't go with a person. Put an "o" if you know it does.

## **SOLUTION**

Kari found the 1911 date.

Nate found the 1896 date.

Susan found the 1887 date.

Josh found the 1902 date.

Susan won the challenge.
