

## Valentine Logic Puzzle

Briana, Eric, Kate, and Peter each brought their teacher a different kind of candy for Valentine's Day: caramels, mints, peanut brittle, and toffee.

Use the clues to find out who brought which kind.

1. The person who brought caramels carried them in his backpack.
2. People who brought mints and toffee had the same number of syllables in their name as their candy.
3. Peter told the person who brought toffee, "That looks yummy!"

	Caramels	Mints	Peanut brittle	Toffee
Briana				
Eric				
Kate				
Peter				

Use the grid, if you would like, to eliminate possibilities. Put an "x" in a box if you know a name doesn't go with a candy. Put an "o" if you know it does.

## **Solution to Valentine Logic Puzzle**

Briana brought peanut brittle.

Eric brought toffee

Kate brought mints.

Peter brought caramels.
