

★ Space Logic Puzzle #2 ★

Four spaceships, named the Eagle, Falcon, Gryphon, and Hawk, were launched in the same year—each in a different month. Use the clues to decide when each was launched.

1. The Falcon was launched before the Eagle.
2. The Gryphon was launched in a month starting with the letter J.
3. The Hawk was launched in the winter.

	January	April	June	September
Eagle				
Falcon				
Gryphon				
Hawk				

Use the grid, if you would like, to eliminate possibilities. Put an "x" in a box if you know a month doesn't go with a spaceship. Put an "o" if you know it does.
